

# UC Neuro Boot Camp Outline 2017

## I. Week 1 videos

- a. Cerebellum/basal ganglia/frontal lobe connection – description of neuroanatomy, focusing on function and clinical manifestations (normal vs. abnormal)
- b. Cerebellum/basal ganglia/frontal lobe - the examination with demonstration for the purpose of helping you easily transition this exam into your existing process.
- c. Tremors – in this straight forward, easy to comprehend video you will learn and understand tremors and what each type means. You will gain an understanding why they are important and how they apply to your Upper Cervical Chiropractic work.
- d. **BONUS** – Generate referrals and patient confidence by learning the “Art of the Talking Exam” as developed by Dr. Robert Kessinger – ***This method will pay for the course as soon as you apply it.***

## II. Week 2 videos

- a. Cranial nerves – Learn a ton of useful information about the cranial nerves and why they are important to understand for the Upper Cervical Doctor. This “get to the clinical point” video will also explain cranial nerve testing.
- b. Cranial Nerves – the examination with demonstration for the purpose of helping you easily transition this exam into your existing process.
- c. **BONUS** – Intro to the Brain-Gut axis

## III. Week 3 videos

- a. The autonomic nervous system and why it is vital to understanding Upper Cervical Chiropractic work/results.
- b. History and Physical examination that uncovers where the patient is related to ANS balance before and after Upper Cervical Care.
- c. HRV explained in a easy to learn, easy to apply format
- d. **BONUS** – “I move, therefore, I am” with thoughts on how it relates to brain development and the upper cervical subluxation
